PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in front-end development, currently exploring full-stack development. Active open-source contributor with a track record of shipping production-quality code.

EDUCATION

Easwari Engineering College

B.E. Computer Science and Engineering — CGPA: 9.40/10.00

Sep 2025 - Present

Chennai, Tamil Nadu

EXPERIENCE

GirlScript Summer of Code (GSSoC) — Open-Source Contributor

May 2025 - Present

Remote

- Ranked 725 out of 45,000+ participants (top 2%) globally in GirlScript Summer of Code, recognized for consistent high-quality open-source contributions.
- Shipped 10+ pull requests across front-end, bug fixes, and performance improvements, all merged into production codebases.
- Built and integrated front-end features using HTML, CSS, and JavaScript, and responsive UI components, collaborating with maintainers through code review cycles to ensure production-quality merges.
- Maintained an active contribution streak throughout the program, consistently delivering features and fixes across multiple sprints and milestones to meet project deadlines.

1M1B, AI for Sustainability — Intern

Jan 2026 - Apr 2026

Remote

- Learned to build interactive dashboards using Tableau to visualize sustainability metrics and communicate data-driven insights efficiently.
- Designed and implemented the web interface using HTML, CSS, and JavaScript, enabling users to visualize demand trends through interactive dashboards and charts.

PROJECTS

Water Demand Forecasting System | HTML, CSS, JavaScript, Python, Scikit-learn

- Designed an interactive dashboard using HTML, CSS, and JavaScript to visualize demand trends and model outputs, improving stakeholder access to insights and supporting data-driven resource allocation.
- Built a machine learning-powered forecasting system processing historical campus water consumption data to generate demand predictions, enabling proactive resource planning.
- Implemented a full data pipeline — pre-processing, feature engineering, and regression modeling with Scikit-learn — to uncover consumption patterns and produce actionable forecasts.

TECHNICAL SKILLS

Programming Languages: Java, Python, C

Web Technologies: HTML, CSS, JavaScript

Developer Tools: Git, GitHub

LEADERSHIP / EXTRACURRICULAR

CMR Hackfest 3.0 — Finalist

Selected among the top 188 teams out of 1,832+ participating teams. Led a team of 4 members through the competition, coordinating task delegation, timelines, and technical direction to deliver a working prototype.
